

# 5<sup>th</sup> Russia-Japan-USA-Europe Symposium on Fundamental & Applied Problems of Terahertz Devices & Technologies (RJUSE TeraTech-2016)

Oct. 31 – Nov. 4, 2016

Sakura Hall, Katahira Campus, Tohoku University, Sendai, Japan

## Scope

Terahertz (THz) electromagnetic waves and phenomena in the THz range are explosively investigated yet not fully unveiled in broad areas of sciences & technologies ranging from fundamental physics to commercial applications.

The symposium aims to bring together researchers who tackle "Fundamental & Applied Problems in Terahertz Devices & Technologies", so as to stimulate discussions on their state-of-the-art results and promote their collaborations.

Based on the successful organizations of preceding symposiums in Japan, Russia, and USA, the 5th RJUSE will be back in RIEC, Tohoku University, Sendai, Japan, on Oct. 31 – Nov. 4, 2016. The technical program will include plenary/invited/contributed talks and poster presentations.
